

## Gravic, Inc.® Announces Shadowbase Version 6.611 for HPE NonStop Server Platforms is Generally Available

Malvern, PA — December 8, 2021

Gravic, Inc. is pleased to announce the General Availability of Shadowbase software version 6.611 for HPE NonStop Server platforms.

Shadowbase is a comprehensive suite of software products that address all aspects of data replication and data and application integration for business continuity and other purposes. It is designed for HPE NonStop servers and heterogeneous platforms (IBM, Linux, Unix, Windows, etc.). It supports industry standard databases, including: HPE NonStop Enscribe, SQL/MP, and SQL/MX, IBM DB2, Oracle Enterprise, Oracle MySQL, SAP Sybase, Microsoft SQL Server, and others.

Shadowbase software version 6.611 for HPE NonStop Server platforms includes several key changes and fixes, along with a roll-up of the prior version 6.610 patches. While download and installation of this release is optional, it is *highly recommended* that customers using Shadowbase *bi-directional replication* on HPE NonStop Server platforms should upgrade at their convenience. Please reference the SOFTDOC, located at [HPE Shadowbase Product Releases](#), for more information.

Shadowbase is built by Gravic, and globally sold and supported by HPE. The applicable HPE Product ID (PID) / Stock Keeping Unit (SKU) is given below:

HPE Product Names	PID/SKU
HPE Shadowbase Business Continuity (BC) Basic	HSA49V6, QSA49V6, BE441AC
HPE Shadowbase Business Continuity (BC) Advanced	HSA50V6, QSA50V6, BE442AL

Customers already holding licenses for the above PIDs/SKUs having a valid support contract with HPE can download Shadowbase version 6.611 for HPE NonStop Server platforms via SCOUT at the [NonStop eServices Portal](#).

The SPR ID for Shadowbase version 6.611 for HPE NonStop Server platforms is as follows:

SPR ID	Platform	Version
T1122^AAU	Guardian	6.611

More information about Shadowbase version 6.611 for HPE NonStop Server platforms can be found at [HPE NonStop Systems](#) and [HPE Shadowbase Product Releases](#).

Gravic, Inc. is a privately-held company located in Malvern, PA, about twenty miles west of Philadelphia, PA, USA. Gravic makes a range of computer software products for business continuity, data collection, transformation, and distribution uses. Customers of its Shadowbase data replication products include banks, financial and brokerage firms, insurance companies, stock exchanges, electric utilities, healthcare, and telecommunications companies.

Hewlett Packard Enterprise directly sells and supports Shadowbase business continuity, data replication and data integration solutions under the name HPE Shadowbase.
